

**Professional grade  
for the construction  
industry.**

You're not a programmer.  
You're a contractor.  
A tradesman.  
A professional.

You need a tool.  
And an edge.

# The Industry's Best Customer Service

Over 60% of our customers have been with The EDGE™ for 10 years or more! Yes, the software is mighty, but the #1 reason users love The EDGE is the customer service. And we are proud of that.

We don't want you to just use it, we want you to love it. That's why we offer intensive hands-on training and U.S. based tech support to answer any questions that might arise.

We offer in-depth hands-on training by professionals who have experience in your trade, ready to answer all of your questions and bring you up to speed on the only estimating software solution you'll ever need.

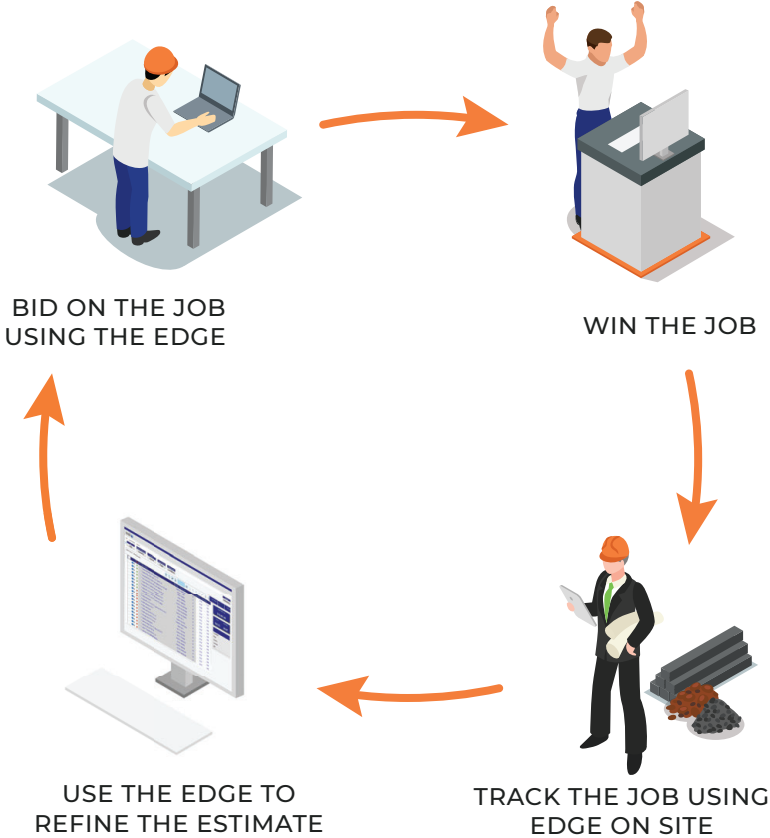

We back it all up with incredible tech support, and constantly innovate to bring you quality upgrades to ensure your software remains as efficient and powerful as possible. Easy-to-use, powerful results.

Builder Built.  
Pro Preferred.™

# Life Cycle of Estimating Edge

Your job data is already available for you, but it can be challenging to analyze. That is why our philosophy is to capture data at key points during the pre-construction, procurement, and construction stages. We provide you with the tools you need to have deeper insight into job performance, allowing you to make better business decisions, faster.

# the EDGE ™

**Professional-grade all-in-one takeoff and estimating software.**

It's a competitive world. Give your business an edge with the solution that quickly turns bids around with incredible accuracy in four easy steps.

The EDGE™ is so easy, you won't remember how you got by without it, and so **accurate**, you won't consider it an "estimate."

### **IMPORT**

The EDGE™ makes it easy to start a new estimating job. Simply, import your architectural blueprints, set the takeoff screen scale and you're ready to go.

### **TAKEOFF**

Make detailed measurements directly on screen just by clicking with your mouse. The EDGE is smart enough to know what units to use based on what you are measuring and automatically calculates the material quantities for you.

### **ADJUST**

Adjust the material quantity, waste materials, taxes, and bond rates and then modify labor rates or change crew sizes. All edits are instantly adjusted throughout the entire estimate.

### **BID**

In-depth reporting keeps you in control of your final bid. Reports are customizable and can be used on the job site to better communicate, order materials, shop around for the best material price, review labor costs, help accounting create a budget or just get a recap of all costs.

on site

## Intelligent Mobile Production Management™ Software

Now that you've won the bid, it's time to "Build it like you bid it.™" Stay on time, on target, and on top of every job from estimate to completion with our easy-to-use tablet app.

When it's time for your **data** to get its **hands dirty**™, you need a tool that extends the power of your estimate to the job site.

### ACTIVATE

EDGE On Site™ brings your EDGE estimate to the job site. Simply access the original estimate on your iPad®, including any blueprints and the details.

### TRACK

What's been built in the field? With virtually no data entry field personnel simply select takeoff "shapes" as they are completed.

### UPDATE

Change orders? When a new change order has been created in The EDGE, your field personnel are automatically notified.

### REPORT

EDGE on Site™ shows you exactly how production matches the original estimate. Now you can find and correct cost overruns before they get out of control. And best of all, you can see how to make this job and your next one more profitable.

# Estimating Edge is more than just a technology company.

We're not a group of elite software engineers trying to pretend we know what contractors need. We're a team of experienced tradesman and software experts who have spent years "in the trenches," building estimates, and building from estimates.

And we don't want to be the best. We want to help you become your best.

Because we are your partners, and your advantage.

Don't Just Estimate Faster.  
Estimate Better
